In our international cooperation in the frame of Erasmus+ KA-226-SCH, launched in May 2021, we aim to develop a knowledge base of methodological and teaching materials and an interactive, freely usable and developable online framework, which will equip teachers with knowledge, ideas, adptness with different methodologies and easy-to-use teaching materials in the difficult situation of COVID-19, while at the same time helping to forge a positive future out of what we can learn from COVID-19. The knowledge base puts a special emphasis on teaching children with learning difficulties and gifted children - while also leading toward new ways of pedagogy for the future, facilitated by digital solutions.
